

SURIYADEEPAN A

DevOps Engineer

suriyadeepan14@gmail.com | +91 9361937763 | Chennai, Tamil Nadu

PROFESSIONAL SUMMARY

Network Engineer L1 with 1 year 9 months of experience in enterprise network operations, transitioning into a DevOps Engineer role. Hands-on with AWS, Linux, Docker, Kubernetes, Jenkins, Terraform, Git, GitHub, Prometheus, and Grafana through practical projects and training. Strong understanding of CI/CD, containerization, Infrastructure as Code, cloud infrastructure, deployment automation, and monitoring. Seeking a DevOps Engineer opportunity to automate infrastructure and build reliable, scalable, highly available systems.

TECHNICAL SKILLS

DevOps & Automation: Kubernetes, Docker, Terraform (IaC), Jenkins, CI/CD, Git, GitHub

Cloud Platform: Amazon Web Services (AWS), EC2, Cloud Workload Deployment

Monitoring Tools: Grafana, Prometheus

Scripting Languages: Python, PowerShell

Networking: CCNA, LAN/WAN, VPN, Router & Switch Configuration, Linux Administration

WORK EXPERIENCE

Network Engineer | Movate

Mar 2026 – Present

- Manage enterprise network infrastructure and production operations, ensuring high availability and service reliability.
- Support AWS cloud-based workloads by monitoring performance, connectivity, and resource utilization.
- Perform incident management, troubleshooting, and root cause analysis (RCA) for critical infrastructure issues.
- Collaborate with cross-functional teams to optimize system performance, scalability, and operational efficiency.

Network Engineer | UST Global

Jan 2025 – Feb 2026

- Provided 24x7 Network Operations Center (NOC) support, monitoring and resolving network alarms, faults, and service-impacting incidents.
- Utilized Nokia NetAct, ServiceNow, and NSM for network monitoring, incident management, ticket tracking, and fault analysis.
- Monitored AWS workloads using Grafana and Prometheus; improved network and system performance by 20% through configuration optimization and proactive troubleshooting.

PROJECTS

CI/CD Pipeline Deployment using Jenkins

Stack: Jenkins, GitHub, Git

- Designed an end-to-end CI/CD pipeline using Jenkins integrated with GitHub webhooks to automate build, test, and deployment of a web application.
- Reduced manual deployment effort and improved release consistency by automating the full delivery workflow.

End-to-End DevOps CI/CD Pipeline & Kubernetes Deployment

Stack: Docker, Jenkins, Kubernetes, Helm, Git, GitHub, Linux

- Containerized a portfolio web application using Docker and automated the build/deployment workflow using Jenkins CI/CD.
- Deployed the app on Kubernetes with Deployment/Service manifests (multiple replicas, NodePort), using Helm for package management and troubleshooting pod/service issues.

Smart Shopping Trolley using RFID Technology

- Automated order processing, bill calculation, and inventory management, replacing manual workflows and improving shopping efficiency by 25% for customers and staff.

INTERNSHIP

Intern — Airports Authority of India

2023

- Gained knowledge of communication systems between aircraft pilots, ground stations, and radar systems (CNS/ATM).
- Observed and studied networking infrastructure used for inter-department communication and data transmission systems.

EDUCATION

B.E. in Electronics and Communication Engineering — DMI College of Engineering

2020 – 2024 | CGPA: 7.5/10

CERTIFICATION

AWS Cloud Computing (ICT Academy) · Python Programming (Guvi) · Network & Hardware Certification (Daphne Infotech) · Internship Completion (Airports Authority of India)
