SURIYADEEPAN A

DevOps Engineer

suriyadeepan14@gmail.com | +91 9361937763 | Chennai, Tamil Nadu

PROFESSIONAL SUMMARY

DevOps Engineer with 2 years of experience in production network operations and AWS workload monitoring, backed by hands-on project work in **CI/CD pipelines, Infrastructure as Code (Terraform), Kubernetes, Docker, Helm and observability (Prometheus, Grafana)**. Strong Linux and networking foundation (CCNA) with a focus on automation, security-first delivery, and reliable, scalable, highly available systems. Seeking a DevOps Engineer opportunity to automate infrastructure and build reliable, scalable, highly available systems.

TECHNICAL SKILLS

Cloud & IaC: AWS (EC2, VPC, S3, IAM, ALB, Auto Scaling, ECR, EKS, CloudWatch), Terraform (modules, remote state), HashiCorp Vault

CI/CD & Version Control: Jenkins (declarative pipelines), GitHub, Git, GitHub Webhooks

Containers & Orchestration: Docker, Kubernetes (Deployments, Services, HPA, ConfigMaps/Secrets), Helm

Config Mgmt & Scripting: Ansible, Linux administration, Bash, Python

Monitoring & Logging: Prometheus, Grafana, CloudWatch

Networking & Practices: CCNA, LAN/WAN, VPN, Router & Switch Configuration; Agile, DevOps culture, RCA & incident management

WORK EXPERIENCE

Network Engineer | *Movate Technologies Pvt Ltd* **Mar 2026 – Present**

- Manage enterprise network infrastructure and production operations, ensuring high availability and service reliability.
- Support AWS cloud-based workloads by monitoring performance, connectivity, and resource utilization.
- Perform incident management, troubleshooting, and root cause analysis (RCA) for critical infrastructure issues.
- Collaborate with cross-functional teams to optimize system performance, scalability, and operational efficiency.

Network Engineer | *Vega Intellisoft* **Jan 2025 – Feb 2026**

- Provided 24x7 Network Operations Center (NOC) support, monitoring and resolving network alarms, faults, and service-impacting incidents.
- Utilized Nokia NetAct, ServiceNow, and NSM for network monitoring, incident management, ticket tracking, and fault analysis.
- Monitored AWS workloads using Grafana and Prometheus; improved network and system performance by 20% through configuration optimization and proactive troubleshooting.

DEVOPS PROJECTS & HANDS-ON EXPERIENCE

AWS Infrastructure Provisioning with Terraform (IaC)

Stack: Terraform, AWS (VPC, EC2, ALB, Auto Scaling, IAM, S3), Git, GitHub

- Built reusable Terraform modules to provision a multi-AZ VPC with public/private subnets, security groups, ALB and an Auto Scaling group of EC2 instances for a highly available web tier.
- Configured remote state in S3 with state locking and least-privilege IAM roles; managed dev/prod environments via workspaces and variables, with changes reviewed through Git pull requests.

End-to-End CI/CD Pipeline with Kubernetes Deployment

Stack: Jenkins, GitHub Webhooks, Docker, AWS ECR, Kubernetes, Helm, Linux

- Designed a declarative Jenkins pipeline triggered by GitHub webhooks: build, test, Docker image build, push to ECR, and automated deploy to Kubernetes, removing manual release steps.
- Packaged the app as a Helm chart with multiple replicas, rolling updates, rollback, HPA and ConfigMaps/Secrets; troubleshot pod, service and image-pull issues using kubectl logs/describe.

Monitoring & Observability with Prometheus and Grafana

Stack: Prometheus, Grafana, AWS EC2, Docker, Linux

- Deployed Prometheus and Grafana to monitor AWS EC2 and Kubernetes workloads; configured scrape targets and built dashboards for CPU, memory, disk, network and uptime to support proactive troubleshooting.

EDUCATION

B.E. in Electronics and Communication Engineering, DMI College of Engineering **2020 – 2024 | CGPA: 7.5/10**

INTERNSHIP

Intern, Airports Authority of India **JUL – AUG 2023**

- Studied CNS/ATM communication systems and the networking infrastructure used for inter-department communication and data transmission.

CERTIFICATIONS

AWS Cloud Computing (ICT Academy) • Python Programming (Guvi) • Network & Hardware Certification (Daphne Infotech)
